**EXPERIENCE:**

**Division of Budgets / Web Developer - Present Employer (Keane Employment Agency)**

Maintain and develop existing websites, intranet, extranet and improved existing documentation within the DOB as part of the development team. I was involved in the preparation of the documentation for the Budget online as well as for print in file types such as HTML, PDF, Word and ADA Accessibility compliancy. In addition I provided support design as well as file format conversion.

**GE FANUC Computer Analyst / Programmer 5/01/06 – 12/26/06**

This position required that I learn three applications VMware Player, Proficy Ifix40 Work Space and RTIP (Real Time Information Portal). Which would enable me to redesign and fix the development of existing software for Coke a client of GE Fanuc. The project was to implement the migration and upgrade from an old version Proficy Ifix32 to the new version Ifix40. I also was part of the team that did the conversion from the old .odf files to the new .grf files. VMware Player 1.0.1 4x and 5x VMware Workstation is powerful desktop virtualization software for software developers/testers and enterprise IT professionals that runs multiple operating systems simultaneously on a single PC. Users can run Windows, Linux, NetWare, or Solaris x86 in fully networked, portable virtual machines - no rebooting or hard drive partitioning required. VMware Workstation delivers excellent performance and advanced features such as memory optimization and the ability to manage multi-tier configurations and multiple snapshots. Proficy Ifix40 is a work Space environment developed by GE Fanuc, which uses Visual Basic Development to design and implement quality software for the corp. business offering a versatile solution. Proficy RTIP (Real Time Information Portal) Version 2.6 a web-based tool for accessing, analyzing and visualizing production information with sophisticated trending and reporting capabilities. View all of your key performance indicators anywhere, anytime. Proficy Real-Time Information Portal provides a web-based overview of all key metrics so you can operate your business more efficiently. Its sophisticated trending and reporting capabilities take advantage of the high performance data storage ability of Proficy Historian, allowing you to focus on continuous improvement.
